- See artwork submission guidelines
- All artwork must be submitted and approved by graphic deadline
- Artwork not approved by the above deadline may incur additional costs
- You will receive a digital proof

Guide for the Production of Graphic Files

Maximum size of file: 1 GB

File format: PDF, CMYK, High Resolution (see notes on resolution on next page)

Crop marks: Do not add any crop marks or other types of marks

Bleed: 150mm on all sides

SILVER Turnkey

Important Notes

File resolution (DPI)

- Files can be sent in different scales for big sizes (10%, 25%, 50%, etc) and must be named as the scale of the content
- If files are saved in a smaller scale, the resolution should be higher to reach 300 DPI when printed at actual size (100%)

COLOR

- All files should be created with CMYK colors
- Before printing, all RGB/Pantone will be converted to CMYK
- Pantone reference should be sent as well

FONTS

- All text must be outlined/vectorized before creating the PDF file
- Keep the space between letters as it will be installed

IMAGES

- All images must be inserted in a clipping mask
- Make sure bitmap images/photos are high quality, 300dpi at print size and are not pixelated
- Graphics should be vector rather than bitmap where possible
